President's Letter

September 1st, 1955

Mr. Roy W. Wills,

Editor-In-Chief
The Highland Cavalier

Clinton College was the scene of much student writing, and other intellectual efforts for the year were held here. Although there were no separate student sessions this year, enrollment, 150, surpassed that of previous years. The students were adults, many being school teachers and other professionals.

The old adage "you never get too old to learn" certainly did prove to be true as most of the very versatile students came through with honors. This was especially remarkable when we remember that most of the older students were carrying on their regular business and household activities during the summer session at Clinton College.

LARGEST ENROLLMENT: Course having the largest number of students enrolled was Biology 1, with 43 students. An eight-week six-semester hour course, classes were held five days a week for three hours. Mr. J. R. Smiddy, business administration, taught the course.

Requests have been made for the course of the Biological Department at Clinton College. In our selection of courses, the course number of Biology 1 was cut. It always affords me much satisfaction to note the increased enrollment at Clinton College that I so eagerly endeavor to return for a visit in the near future. I hope to see many of our students present again.

WE ARE ON OUR WAY FORWARD
September 12, 1955 marks the beginning of the second year of the Community College era. The College has been made possible by the great generosity of the people of the community. The College is open to all who wish to learn. It is a new and strange adventure, but whereabout are those who are ready to take advantage of the College's offerings?

The Second Year

What we can expect of our young people are to inherit. The word sophomore comes from a Latin word meaning "second year." For some, it means a new and strange adventure, but for others, it means a time of uncertainty. The sophomore year is a time of change and growth. It is a time to explore new ideas and develop new skills. It is a time to think about where you want to go in life and how you want to get there.

The College of Southern Virginia was established to provide an opportunity for students to continue their education after high school. The College offers a wide range of courses in various fields of study. It is a place where students can learn and grow in a variety of ways. It is a place where students can make new friends and connections.

College life can be exciting and rewarding, but it can also be challenging. It is important to be prepared for the experiences that come your way. It is important to be flexible and open to new ideas. It is important to be willing to take risks and try new things.

The College of Southern Virginia is committed to providing a safe and supportive learning environment. It is a place where students can learn and grow in a variety of ways. It is a place where students can make new friends and connections. It is a place where students can be themselves.

College life can be exciting and rewarding, but it can also be challenging. It is important to be prepared for the experiences that come your way. It is important to be flexible and open to new ideas. It is important to be willing to take risks and try new things.

School Makes Plans For Science Fair

A Science Fair for high-school students in the five counties of Russell, Dickenson, Scott, Lee and Wise, to be held next March at Clinch Valley College, is becoming a distinct probability. Plans are being worked on which will allow the students to utilize their Principals or Science teachers in preparing the local school superintendents to prepare exhibits of a scientific nature for this Fair.

Such fairs in other localities have been very successful, with those submitting the best exhibits being eligible to show at the Western Virginia Science Fair at Roanoke College in April. Exhibitors will have a chance to show their exhibits being eligible to show at the Western Virginia Science Fair at Roanoke College in April. Exhibitors will have a chance to show their exhibits at this fair.

New Schools Are Opened In Area

Coeburn, Rye and Clinch Valley colleges have completed high schools available for this year. Open house at all of those new buildings attracted many of the students who attend the Clinch Valley College.

On Monday, August 9th, at the Rye Cove High School, Open House, Mr. H. R. Richmond, a member of the Local Board of the Clinch Valley College, was master of ceremonies. The Big Stone Gap Band gave several selections and Dr. Campbell, Clinch Valley College, made the principal address. Others who appeared on the program were Rev. J. M. Watklns, Dungannon; Rev. J. M. Watklns, Dungannon; Mr. E. Hagan Richmond, Rye Cove High School, Mr. Grady Coley, former principal of these schools.

The Oxford Companion to English Literature and other dictionaries (French, Spanish, German) ready for use. The new reference books include thirty-three volumes of Encyclopedia Americana, dictionaries of biology, chemistry, and mathematics. Professors study these thoroughly, then order back to the department of Biology, Chemistry, and Mathematics. Professors study these thoroughly, then order back to these which include education, journalism, magazines, of recent events and scientific journals. Among the order in Harper's Magazine, The New Yorker, and Education, New Yorker, and the World and an Encyclopedia of Sports will also be available. Some of the sports which have completed high schools available for this year. Open house at all of those new buildings attracted many of the students who attend the Clinch Valley College.

New Libraries

Library C. V. C. has certainly changed this summer. Among the many improvements in the addition to the library. This new room, formerly a porch, is now complete with bookcases. It can be entered from either the hall or the library.

We also have a new librarian, Mrs. Lewis. She reports that many periodicals and reference books have been bought and will be ready for the fall session. Mrs. Lewis, a Librarian, is a new member of the Clinch Valley College department of Biology, Chemistry, and Mathematics. Professors study these thoroughly, then order back to these which include education, journalism, magazines, of recent events and scientific journals.
