Bids On Science Building Have Been Released

Advertisements for bids on the construction of a new science and engineering building for Clinch Valley College were released on Sunday, January 21. The new half-million dollar building will be located on the hill which dominates the four-hundred-series of vending machines, and will be adjacent to the academic building completed five years ago.

The new structure will fill one of the most vital needs of the community college as more of its students pursue scientific careers, and the courses offered will open up new opportunities. The building will contain separate laboratories for general biology, botany and zoology, first-year and advanced chemistry and physics, and psychology. It will also have separate laboratories for other programs of study along with the necessary preparation rooms, instrument rooms, machine shop, dark room and storage rooms. It will also feature facilities for research in the sciences and an excellent teaching drawing room. It is estimated that the equipment for the building will cost in the neighborhood of $150,000.

An important feature will be the theatre-style lecture hall, which will seat 150 persons. Not only will this hall be of enormous benefit to the teaching of science and engineering, but it will also be used by other departments for lectures and the showing of films. Mr. Joe C. Smalley, the director of the college, summed up the importance of the hall in this way: "We at the College have been very pleased that an increasing number of groups have chosen to hold conferences on subjects of vital importance to our whole region. We look upon this as one of our natural functions, and we are most anxious to aid any groups interested in the facilities needed. We believe that the design and capacity of this hall will make it ideal for this purpose.

The building will be of contemporary design, and will reflect the style of the existing new buildings.

How To Add Or Drop A Course

ADDING COURSES — In order to change one's program of studies, a written permission of the Dean must be obtained. Permission to add courses will be given only until Wednesday, February 18.

DROPPING COURSES — A student who is making no real progress in a course may, at any time during the semester, be excluded from the course by the Dean upon recommendation of the instructor. Permission to drop courses will be given only until March 18th for the second semester.

VOLUNTARY WITHDRAWAL — An official application to withdraw must be obtained from the Registrar, and must be approved in writing by the Dean, with a statement of the reason for withdrawal. A student under 21 years of age must have parental approval for such withdrawal. To obtain the student's record, the application must then be forwarded to the Registrar and the Business Office. When completed, the withdrawal form must be signed by the student and returned to the Registrar, who will forward it to the University governing body.

Students Register Second Semester

There was a decrease of 51 students over fall semester. This number included the rights that were approved in 235 students. All students from the class of 1968 will be placed on probation. From the total of 231 students registered for the fall semester, only 20 students will be academically and morally in danger of suspension from the Dean's list.

The new building, which is used as a laboratory in the number of class members, is a separate lab for both second-year physics, and for both organic and analytical chemistry. A separate laboratory for both groups will be located on the hill which dominates the four-hundred-series of vending machines, and will be adjacent to the academic building completed five years ago.

Students Registering Second Semester are listed below. A student who is making no real progress in a course may, at any time during the semester, be excluded from the course by the Dean upon recommendation of the instructor. Permission to drop courses will be given only until March 18th for the second semester.

Community Industrial Meeting Held At CVC

The Community Industrial Meeting was an all day conference held at Clinch Valley College January 29. Attendance was over 700 persons from the hills and valleys of Virginia. In addition to speakers from S.P. Smith, the director of the college, and various members of faculty, there were also instructors from different departments for lectures and the showing of films. Mr. Joe C. Smalley, the director of the college, summed up the importance of the hall in this way: "We at the College have been very pleased that an increasing number of groups have chosen to hold conferences on subjects of vital importance to our whole region. We look upon this as one of our natural functions, and we are most anxious to aid any groups interested in the facilities needed. We believe that the design and capacity of this hall will make it ideal for this purpose.

Beatles Take Clinch Valley By Song And Haircuts

The Beatles (not beehives) have taken CVC by storm. Not only is the title of "You`re My Lady" common, but a great number of cutters are following "Lucy in the Sky with Diamonds."" The group's songs are bad on both the hard-core's was only on boys, but the girls are sure to wear them as well.

Semester Grades Are In And Few People Are Happy

Semester grades are in and few people are unhappy with them, but all are grateful that they are over. Many students who worked very hard throughout the semester were disappointed with their grades.

Political Club To Be Formed On CVC Campus

The students of CVC are planning to form a political club this year. There are a number of political groups on the campus already, but this is the first attempt to form a national political club. The purpose of the club is to bring together all students interested in politics and to give them an opportunity to discuss and debate political issues.

Community College Students Named As Outstanding Students

Three students from the Community College were named as outstanding students in the state. They are: Betty Vaughn, who is a business major; Eddie Shepard, who is a science major; and Eddie McAdoo, who is an engineering major.

Library News

The library has received a number of gifts this year, including a collection of rare books and a large collection of old newspapers.

What Is Right With Clinch Valley

Clinch Valley College is a symbol, or perhaps the symbol, of what education, leadership, and citizenship means to me. I choose Clinch Valley College for several reasons. I have several friends who have acquired their first two years of college work here at Clinch Valley College. It is a small college, and I view small college as a very important aspect of what we really mean by education. It is a part of the experience of being at the college. The professors take time out from their busy schedule to assist me in any possible way they could. The girls in the campus are very patient and understanding with me about the problems that I have encountered in obtaining my degree from the different schools that I have attended.

The statement would indicate that Clinch Valley College is a very small college and that we cannot do all of the things that we can do at larger colleges. The advantage of going to any college anywhere in the area, however, can receive a liberal education, if you have the time, the money, and the interest. Clinch Valley College does not have all of the facilities of any college anywhere in the area. Here, one can receive a liberal education, but if you want to learn about anything that you are interested in, you will have to be as disinterested in the value of the different courses of study that are taken in the larger colleges. The college cannot do this. The college can do this. I have a comment to make on this. One gets out of a course that he or she has taken in the larger colleges, the college cannot do this. The college cannot do this. I have not experienced anything that is taken in the honor system here. I am amazed at the pride that is taken in the honor system here. I have not experienced anything different at all.

University Begins Full Time Radio Operations First Time

WTJL, the student-operated FM radio station at the University of Kentucky, Virginia, began broadcasting on a full-time schedule Wednesday (2/6) from its new studio in Humphrey's Hall.

The station has a $17,000 worth of new and replacement equipment, bought from student activity funds, in its new home. With its new equipment, students, faculty, staff and facilities of the radio and recording center in Cabin Hall, will be able to broadcast two additional hours a week.

Circle K Has Inter-Club Meet At Emory And Henry College

On Feb. 16, 1964, the Clinch Valley College Circle K traveled to Emory and Henry College, in Emory, Virginia, for an inter-club meeting.

The program, made up by the Emory and Henry College Circle K, was a lecture and afterwards a movie narrated by Dr. J. S. Pianka from Alleghany, Va. In his lecture, Dr. Pianka gave information concerning the latest advances in fighting cancer. He said of the most definite cause is a cancer of benzen or a cigarette which is cheap power, but it is being used for something else. The big business is being used for something else. This is cheap power, but it is being used for something else. The big story is that the students have to be as disinterested in the value of the different courses of study that are taken in the larger colleges. The college cannot do this. The college cannot do this. I have a comment to make on this. One gets out of a course that he or she has taken in the larger colleges, the college cannot do this. The college cannot do this. I have not experienced anything that is taken in the honor system here. I have not experienced anything different at all.

New Activity Program Planned

Due to a failure in the planned student activity program this past semester, a new activity program has been proposed. It is as follows:

First Tuesday
Highland College 203/127
Second Tuesday
D.R.I. 203/127
Third Tuesday
D.R.I. 203/127
Fourth Tuesday
Emory and Henry College 203/127
