Student input sought for tobacco ban

By Todd Galyean
News/Features Editor
mtg7h@uvawise.edu

This August, in anticipation of the fall semester, Sim Ewing, vice chancellor of finance and administration, sent out an email reminding students and faculty of the smoking policies on campus. Unlike most mass emails, Ewing received a response.

"I received immediate feedback regarding tobacco in general on campus, and one of the main issues there was smokeless tobacco in buildings," Ewing said. "From that, we brought it up in our cabinet meeting. [Student Government Association President Phillip] Blevins asked me to come talk to SGA about the issue, and we received suggestions to gather direct student opinion on the topic."

SGA will host a forum on banning smokeless tobacco in campus buildings at 1 p.m. Oct. 17 in Cantrell Banquet Hall.

The faculty senate and the staff council are also in the process of speaking to those they represent about the issue.

"We wanted to have campus-wide meetings so everyone could give feedback, pro or con, on the measure," Ewing said. "We could just simply do it right now, but

we want to see what the constituencies of all three groups think. When we get that information we will act using that and do what we think is in the best interest of the college."

Ewing said he knows this type of change could be seen as drastic, but he is confident the school's administration can handle the necessary changes.

"This could be a hot-button issue, and we thought it would be best if something was going to be done with it, then it should be done prior to a new chancellor, so that they wouldn't have to deal with a thorny issue right off," Ewing said.

Rules and penalties regarding a possible smokeless tobacco ban in buildings have not yet been developed, though Ewing said that college officials will consider how other institutions have handled similar initiatives.

One detail that would be included and that may cause some confusion is that a ban would include athletic venues, inside and out, as they are defined as buildings.

"It's a difficult issue. How do you enforce this type of change?" Ewing said. "But I know we will make the best decision regarding the interest of this college."

This is a sensitive topic on campus,

and students fall on many different sides of the issue.

Freshman history and music major Corbin Hazelett said there's no question as to what should be done.

"I think it should all be banned from campus," Hazelett said. "Cigarettes affect other people with the smoke and with the litter their butts cause on campus. For chew and dip, I personally find it disgusting. People just leave their half-full bottles of spit around or dump them out on campus. It's just nasty."

On the opposite side of the spectrum, freshman pre-physical therapy major Kennedy Sluss, an occasional tobacco user, said he feels empathy for those who would be affected by the change.

"I have friends who have been dipping since they were nine-years-old, and to take away something that they do now, everyday on campus, is just kind of absurd," Sluss said. "Especially when, in this area, there's so many people that do it ... I know there's those few people who aren't responsible and make a mess with it, but you can't punish everyone for what those few people do."

Sluss related the issue to the common problem of graffiti.

"Only a few people write on the bathroom stalls," he said. "But they aren't having a forum to take those away."

Ewing

'Violence is a very simple topic.'
-Steven Pinker

Jessica Shartown | The Highland Cavalier

Steven Pinker, a professor at Harvard University and a psychology scholar, delivers a lecture Sept. 28th to more than 500 students, faculty and community members in the David J. Prior Convocation Center. Pinker focused his lecture on the violence, the topic of his most recent book, "The Better Angels of Our Nature: Why Violence Has Declined," offering evidence and theories about why he thinks societies throughout the world are seeing less violence than in the past despite the appearance that this century is wrought with conflict.

SGA adds new positions

By Todd Galyean
News/Features Editor
mtg7h@uvawise.edu

Two new positions — parliamentary and public relations officer — have recently been added to the Student Government Association, the duties of which are based on tasks previously assigned to the secretary.

"The purpose of the parliamentary is to make sure that we follow and better understand Robert's Rules of Order and to assist the secretary in making sure senators are actively completing their requirements in the office," said senior administration of justice major and SGA President Phillip Blevins.

The public relations officer is set to handle interaction with outside organizations as well as social aspects of SGA.

"The public relations officer will work to tie the SGA together, make sure we are operating cohesively, plan social events, run our Facebook and Twitter accounts, publicize all of our events and maintain our relationship with the media," Blevins said. "In the past these jobs have sort of been the duty of the secretary but with taking minutes and the other duties she is responsible for, there's a lot on her plate. So with adding this position we are not only creating another opportunity for leadership but we are adding opportunity to help the SGA

grow."

But the current SGA constitution already defines which jobs are the duty of the secretary as an executive board member and the chairperson of the Communications Committee.

The constitution reads "The Communications Committee shall be charged with the responsibility of informing the college public and the student body of activities and actions of the senate through printed and electronic media in a timely fashion. The secretary shall be the chairperson of the Communications Committee ... The Communications Committee shall be charged with the task of taking the appropriate measure to document, via written and photographic means, all the activities and events of the Student Government Association. This record shall be included in the college newspaper and the Student Government Association website."

SGA members seem aware of the discrepancies between the constitution and these newly created positions.

"We actually have a committee working on that right now that includes most of our executive board members," said senior administration of justice major and SGA Secretary Kimberly Hamm. "They are working on revising the whole constitution to include the new public relations officer, parliamentary and just working out the

kinks that we do not have fixed."

Constitutional changes must also be voted on by the student body.

One other possible change did not find favor in the senate at the Sept. 28th meeting, when a proposed six-member president's advisory committee (PAC) was voted down.

The PAC, sponsored by Blevins, was intended to advise the president about relations in six areas: college, community, traditional students, commuting students, nontraditional students, residential and apathy concerns.

Enough of the senate felt that the PAC was unnecessary that the proposition to add the positions failed upon voting.

"Some of the positions that PAC was going to be for was to take some stress off SGA members but there were members that were confident they didn't need that help, so they didn't think the committee was needed," Blevins said.

The vote took two attempts because senators had to be asked after the initial vote to raise their hands high enough so that they may be tallied accurately.

"A lot of the indecision in the vote had to do with the fact we have a lot of new members this year and there's only a couple returning members," Hamm said. "So I think there's some that are still nervous about voting no."

News Briefs

Nursing program advising and applications available

Cathie Collins, chair of the Nursing Department, will be conducting advising sessions for any student interested in the nursing program on Oct. 24 from noon to 2 p.m.

The deadline for applying for admission into the nursing program is Nov. 1. Applications can be obtained online at <http://www.uva-wis.edu/nursing/> or from Kim Lawson in room B023 of Darden Hall.

-Jessica Shartouny

Deputy spaceport director to speak on space mission

Former U.S. Navy air commander and deputy director of Virginia's Mid-Atlantic Regional Spaceport, Zigmund "Zig" Leszczynski, will give a talk on the capabilities of the spaceport and the projects that are underway.

One mission Leszczynski will address is NASA's Lunar Atmosphere and Dust Environment Explorer (LADEE), which is supposed to study the moon's global density, composition and time variability of the lunar atmosphere. The mission will also aid architects and engineers in designing the first lunar outpost for humans on the moon's surface.

The talk will be held at 3:30 p.m. Thursday in room 104 of Smiddy Hall. Students, faculty and interested public are invited.

'It changed my life for the better' Student survives cancer, now advocates

By Emily Baxter Staff Writer enb5u@uvawise.edu

"It was so unexpected. I had no family history of any type of cancer."

These thoughts run through senior education major Kim Mullins' head when she thinks back to when she was diagnosed with breast cancer in the spring of 2010.

Mullins, who graduated high school in 1983, went to Mountain Empire Community College, the place where she met her husband.

Upon graduation, Mullins worked as a jeweler, a youth counselor and as an aid in a local high school before deciding to attend UVA-Wise to earn an education degree.

"I was hearing students say they hated school," Mullins said. "Teachers are the foundation of education. Without them, there are no other careers. I thought I could do a good job teaching; students need to be excited and should want to learn. So, I came back."

Enrolling as a student in 2008, Mullins worked toward getting her degree until one day in November 2010 when she felt a worrisome lump in her breast.

After calling the health department and not hearing anything back, she ignored the lump for a few months.

"I realize now how lucky I am," Mullins said. "I knew something wasn't right, but I didn't know what to do about it."

After a hard winter, Mullins called the health department again to set up an appointment.

"I was so worried," Mullins said. "I didn't have

any medical insurance and we were tight on money." The diagnosis came back that Mullins had HER2 breast cancer, an aggressive but treatable form.

"At the time, I didn't even realize there were different types of breast cancer," Mullins said. "Luckily, I didn't have the worst kind - but I still had it."

Mullins qualified for Medicaid and started rounds of chemotherapy and radiation.

"I lost all my hair," Mullins said. "It didn't matter, though; I was getting better."

After successfully beating the odds, Mullins returned to campus in spring 2011 to continue toward her goal of becoming a teacher and to share her story with young women on campus.

"Eighty percent of newly diagnosed cases have no family history of cancer," Mullins said. "I didn't [have it] in my family, and look where I came from. Early detection is key and saved my life. If you think something's wrong, go to the doctor. Isn't it better to know it's nothing than to not know it's bad?"

Mullins and her husband, Rod, who now advocate for breast cancer patients and survivors, are excited about what Wise has in store this month for breast cancer awareness.

"Central [High School] will have a 'Pink Out' game in October. The shirts are going to say 'Real Warriors Wear Pink,'" Mullins said. "There's also a 'Paint Wise Pink' event throughout October."

Donations from the Paint Wise Pink event will go toward support groups for supplies and the Mountain Laurel Cancer Center.

"We want to help others," Mullins said. "It's strange to say, but this changed my life for the better. I'll have a better life and appreciate more because of it."

Alumni return takes planning

By Emily Baxter Staff Writer enb5u@uvawise.edu

For students, homecoming is just a reason to cheer extra loud at the football game, get dressed up and pick up a free glass.

For others, like alumni, it's a chance to come home and to be reminded of the good times they had on this campus.

Pam Collie, Director of Alumni Relations, knows homecoming is much more than a football game for our alumni.

"Planning for homecoming begins in January," Collie said. "Alumni are able to tour campus, visit the bookstore, meet and greet with fellow classmates and former professors, cheer on their Cavs, tailgate and rekindle their passion for the college."

"We also encourage involvement of alumni with current students at the Alumni Family Carnival, the Red & Gray 5K and the pep rally."

These events are possible due to the hard work of the Alumni Association Board of Directors, Collie said, adding that the Alumni Association funds the events with two large fundraisers each year.

"The events surrounding homecoming [are funded by this] including the mailings, food and tent rentals," Collie said.

Collie said she expects between 900 and 1,400 alumni to come back to campus annually for homecoming.

"When they return and see the many changes, they are able to see how their financial support over the years is paying it forward to the students today," Collie said. "I know they also enjoy seeing the homecoming court and the crowning of the new king and queen since this has been a part of campus life since 1954."

Collie said it's a good time of year to catch up with former students.

"I love this time of year," Collie said. "It's hectic, but it's a very rewarding time for us."

Jessica Shartouny | The Highland Cavalier

Students, faculty participate in Rhythm & Roots

By Brianna Foster Staff Writer bf2q@uvawise.edu

Some UVA-Wise students and faculty were involved in the award-winning music festival, Bristol Rhythm and Roots Reunion.

The annual event shut down all of State Street in downtown Bristol, Va. from Sept. 14 to 16. More than 50,000 people came to enjoy a mix of bluegrass, folk, soul, country and rock music, organizers said.

More than 180 bands performed over the three days, including Wise locals.

Guitar instructor Chris Rose and singer/songwriter Anthony Keys played together at the festival.

This was Rose's second consecutive year playing at Rhythm and Roots.

Rose was asked to play at the 2011 festival over he and student Chris Woodward played one of the first shows of the Rhythm and Roots concert series

on campus.

"I will play as long as they book me. They treat the bands with respect, and it's all about the love of music," Rose said. "It's like a family; we're all a family. We were treated so well by everyone. I love the festival; it's amazing. The eclectic music, all types of people. It's an amazing experience because it transcends all demographics. It's a good vibe, a very peaceful vibe, and the music is amazing."

Rose has been playing the guitar for approximately 30 years and giving lessons for 20 years.

Rose teaches many different guitar classes on campus as well as one-on-one lessons.

Junior business major Ryan Markham also worked at the festival as a stagehand for the second consecutive year.

Markham said that he not only loves the music, but the warm environment, too.

"Everybody acts like one big family. Everyone is nice, even the artists. Everybody is there to help

you."

Markham plays the mandolin in the Bluegrass Ensemble on campus, instructed by Rose. They both have high hopes for the band.

They also hope to break with any stereotypes associated with bluegrass.

"I would like to see all stereotypes and that preconceived notion that it's 'redneck' or you're less than a musician if you're playing that uncutlure-type music [be done with]," Rose said. "There's a lot of thought that some of the greatest musicians in the world are playing bluegrass, playing folk music. I like to tear down the walls of closed-mindedness because most people are just so set in their ways. Music should make you smile, and that's what it's all about."

Other notable bands that played at Rhythm and Roots were City and Colour, David Mayfield Parade, Robert Earl Keen, Spring Canyon Rangers and local bands Folk Soul Revival and If Birds Could Fly.

Senior works for Town of Wise, plans festival

By William Yearoui Staff Writer wmy2m@uvawise.edu

Most of the folks on campus have attended, at one time or another, an event hosted by the Town of Wise.

Events like these, while not college associated, typically attract a large number of students.

For senior communications major Mike Amory, who is employed by the Town of Wise as a special events assistant, these events are all in a day's work.

"The position, more or less, fell into my lap," Amory said. "I was in need of an internship for my communications major and was looking for an opportunity in every situation... I got an unpaid internship which later turned into a job."

Helping to coordinate events is not easy, despite how straightforward it may sound, Amory said.

Planning is done far in advance, and an ability to think "outside of the box" is more than needed.

"My work is different for every time of year," said Amory. "In the summer, I helped with creating ads for concerts and making sure the events ran smoothly. Currently, I am writing a monthly town newsletter consisting of two main stories, a section about UVA-Wise's important dates and advertisements for local businesses."

"Working for the town is sometimes challenging, and I often find myself referring to textbooks and talking to my advisors for help and advice," Amory said. "Appealing to the community as a whole is hard because everyone does not like the same things."

Despite having to cater to such a diverse crowd, Amory said town events are typically very well-attended.

Up next on Amory's menu is the annual Wise County Fall Fling, which starts Oct. 13 on the Wise Courthouse mall.

Despite all of his work here in Wise, though, Amory says he hopes to move on.

"I am in the process of applying for grad school at [Old Dominion University] and Georgetown. I want to get a Master's in advertising or corporate communications," Amory said.

In the meantime, Amory is encouraging students and community members to attend the Fall Fling.

"All the events are free, which allows anyone and everyone the ability to participate in the activities," Amory said.

Losing for Landon: campus cop sheds pounds

Photos courtesy of Nichole Davis

Campus Police Officer Nichole Davis documents her weight in February before she started a diet regimen (left), in March after losing 60 pounds (center) and in September after losing 151.4 pounds. Davis has lost over half of her body weight since February and is close to reaching her final goal.

By Emily Baxter Staff Writer enb5u@uvawise.edu

You might know Nichole Davis as the only female police officer on the UVA-Wise campus.

But now she's turning heads and making students proud with one of the hardest and most rewarding things she's ever had to do - losing more than half of her body weight.

Davis decided to take this life journey after looking in the mirror one day before her son Landon's third birthday.

"I thought that I was headed straight for a heart attack and would not get to see Landon grow up," Davis said. "Landon is my whole world and my God-given purpose on this earth."

Davis was inspired by her mother, she said. She decided to go on a diet while taking hormone products that assist in weight loss after watching her

mother lose more than 170 pounds and avoid a possible knee replacement.

"HCG is a comprehensive diet and exercise plan," Davis said. "I go to a clinic in Kingsport, Tenn., called LiveFit Medicine."

Davis said she set her weight-loss goal at 180 pounds and started her journey on Feb. 7.

Support has been the key for losing weight, and, most importantly, keeping it off, Davis said.

"I could not have done this without all the support that I have gotten from my family and friends," Davis said. "I post on Facebook every day how much I have lost. I am friends with such an array of people; I never realized what an impact my posts would have. Several people have decided to do this diet to become a healthier person."

One of the people Davis inspired was her husband Chris, director of the David J. Prior Convocation Center. He decided to help support her by changing his eating habits, she said.

"Chris has lost over 70 pounds," Davis said. "Our goal was to help Landon understand from an early start how and what to eat to be healthy."

The greatest joys for Davis are what she can do and what she doesn't have to do now, she said.

"I no longer have to take my blood pressure medicine," Davis said. "I can see and touch my toes, which may not be amazing for some, but it is for me. As a family, we have [gone] on several trips that, before I lost the weight, I would not have been able to take, like going to zoos and other places where you have to do a lot of walking up and down hills."

Davis said she is open to anyone who wants to sit down, talk about her journey and receive advice about becoming healthier.

"So many people have told me they are changing their lives because of me," Davis said. "You have to find a reason and purpose that will help you make the decision to lose weight and be a healthier you. Landon is the only reason I need. What's yours?"

Wise blazed by Belhaven in homecoming game

Jessica Shartouny/The Highland Cavalier

Senior Cavs cornerback Marcus Bratton (9) tackles Blazers wide receiver Kyran Pollard (2). Bratton had two tackles on the day including this one. Pollard finished the game with three catches for 55 yards.

Cavs on five-game skid after upset win

By Corey Sanchez
Opinion Editor
cs6ty@uvawise.edu

Homecoming night was a night to forget as the Cavaliers could not find a way to slow down the Blazers' offensive attack as the Blazers took a 52-14 blowout win over the Cavs.

In the first quarter, UVa-Wise took over on offense for the first time after Belhaven bobbled the snap on a field goal attempt.

Freshman running back Connery Swift and company did not waste any time opening up the scoring by busting through the Blazers' defense for an 84-yard touchdown run.

Swift would finish the evening with 135 yards on 17 carries.

After the Swift score, Belhaven went on the attack, putting together a seven-play, 75-yard drive.

Blazers running back Kadéro Edley capped the drive with a 46-yard touchdown run.

The Cavaliers hardly moved the ball on its next offensive series, which was highlighted by a 15-yard catch-and-run by junior receiver Michel Steele.

A Dean Hogan punt placed Belhaven deep in its own territory at the 10-yard line.

The Blazers' offense pieced together a nine-play 90-yard drive that ended with Joshua Hawkins' 2-yard scamper to pay

dirt.

Belhaven gained the lead, 14-7, for the first time and never looked back.

Trailing by seven in the second quarter, senior returner Marcus Bratton took the kickoff 53 yards, giving the Cavaliers' offense excellent field position.

The offense stalled once again, but this time junior kicker Paul Melshen was sent to try a 51-yard field goal.

The attempt failed and Belhaven took over at its own 35-yard line.

The Blazers put together another touchdown drive off of the field goal miss, going 65 yards downfield, extending the lead to 21-7.

UVa-Wise would fumble on the next possession, giving Belhaven the ball on the 18-yard line.

The defense finally stiffened and held the Blazers to a James Bryan 30-yard field goal, making the score 24-7.

The next UVa-Wise drive went three-and-out, and ended with Hogan's punt being blocked, placing the ball inside the 20.

It would take the Blazers five plays to cross the end zone for the third time in the quarter.

Belhaven would take a 31-7 lead into the locker room.

After halftime, Belhaven put together a 90-yard drive that culminated in a 1-yard touchdown by Patrick Wilson, widening the lead to 38-7.

UVa-Wise showed signs of life on its

second drive of the third quarter as quarterback Cullen LaVoi connected with wide receiver Julian Stewart on a 47-yard touchdown pass. With the score, the Cavaliers shortened the gap to 38-14.

It was Stewart's first touchdown reception in a Cavalier uniform. He led all receivers with 103 receiving yards for the game.

Belhaven continued to flex its muscles in the fourth quarter after LaVoi threw an interception.

The Blazers took over on the Cavalier's one-yard line, and marched downfield 99 yards, concluding with an six-yard touchdown run by Alex Williams.

It was now 45-14 in favor of visiting Belhaven.

The scoring drive was the team's third scoring drive of 90 or more yards on the night.

On the ensuing Cavalier drive, the offense committed another costly error as LaVoi fumbled the ball.

Belhaven's Calvin Lewis came up with the ball and gave it to his team at Wise's 11.

It took Blazers' Raymond Cotton two plays to punch the ball into the end zone, delivering the kill shot and making the final score 52-14.

The Cavaliers will attempt to put this losing streak to rest this weekend when they travel to Bluefield College. Kickoff is set for 6 p.m. Saturday.

Students and some faculty members seem willing to do whatever it takes to win a free intramural championship T-shirt playing the sport they enjoy, even if it means sacrificing their bodies.

So far, intramural soccer and flag football championships have shown this to be the case this semester.

After many game delays due to inclement weather, the soccer post-season tournament began on Sept. 20.

With play taking place throughout the weekend, Staff Infection suited up to face GMFAT in the championship game on Sept. 23.

Staff Infection was going for its fourth title in a row, though GMFAT has had its fair share of success in the past.

Staff Infection cruised to a 2-1 victory in sudden death on a penalty kick by one of the only students on the team, senior biology major Jack Wayland.

"Our team is pretty selfless, so we don't worry about things like who is getting the goals and assists," said John Adrian, chair of the Department of Language and Literature. "I think that is why we've been so successful the past few years."

Adrian is a member of the flag football, basketball and softball intramural teams.

Wayland scored the only two goals of the game for Staff Infection. One goal came in sudden death and the other was scored late in the final

minutes of regulation.

GMFAT led most of the game after scoring early on a long kick from sophomore Steven Allen. Allen was selected as Intramural Athlete of Week for the men for week one and is also a member of the baseball team.

On the same night, DINOS faced the two-time champions, 'Merica, in the women's bracket. 'Merica edged the DINOS out in sudden death 1-0 in a hard-fought game for both teams.

Junior biology major Samantha Robinson scored the only goal in the game. Robinson was named the Athlete of the Week for the women.

In both brackets, the No. 1 seed edged out the No. 2 seed for T-shirt bragging rights.

Less than a week later, on Sept. 25, Staff Infection showed up on the gridiron to beat Beta Pi in flag football.

Staff Infection proved to be strong on the football field as well, winning 34-6.

In another game, GMFAT got off to a steady start, leading by nine at the end of the first half, but The Romans came storming back in dominating fashion with a 18-13 victory.

Senior John Willis Morris had the strongest game for GMFAT with 10 flag pulls on the defensive side of the ball.

For The Romans, junior criminal justice major Blake Duffy had two touchdown receptions from quarterback junior Andrew Jessee. Duffy's touchdown catches came from a 35-yard pass as he snuck past sophomore Blake Salyer for the score and a wide-open 38-yard catch in the end zone.
